

Exporting a clip (e.g. TMP) for use in other products, such as Vitascene

Select the Clip (Select In/Out if necessary, or entire clip)

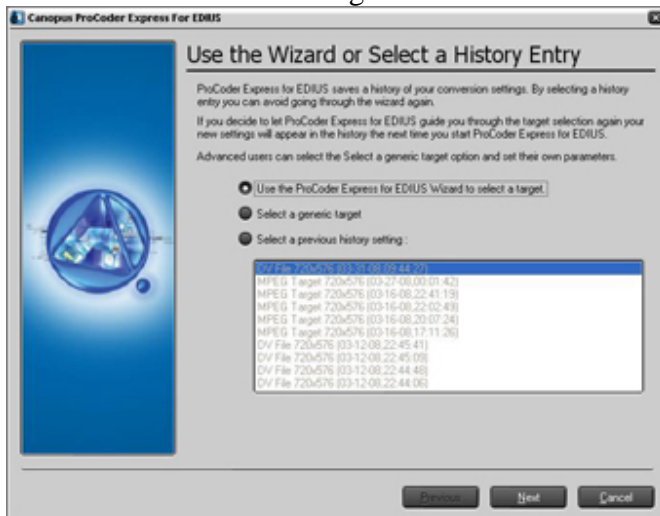

Press F11 and Select Print To File

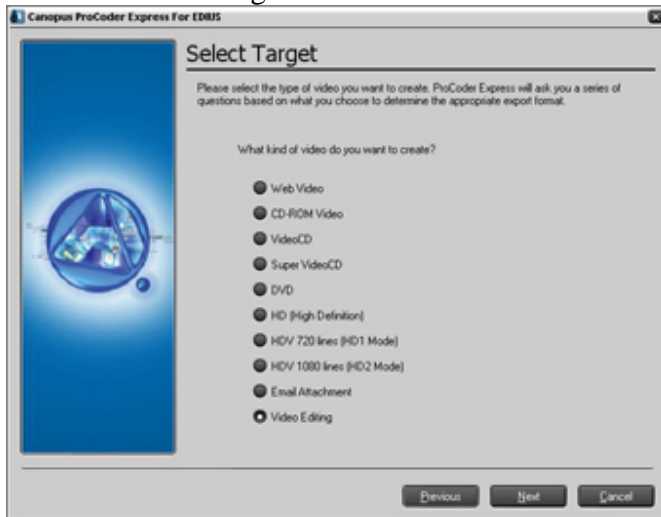

Select Canopus ProCoder Express

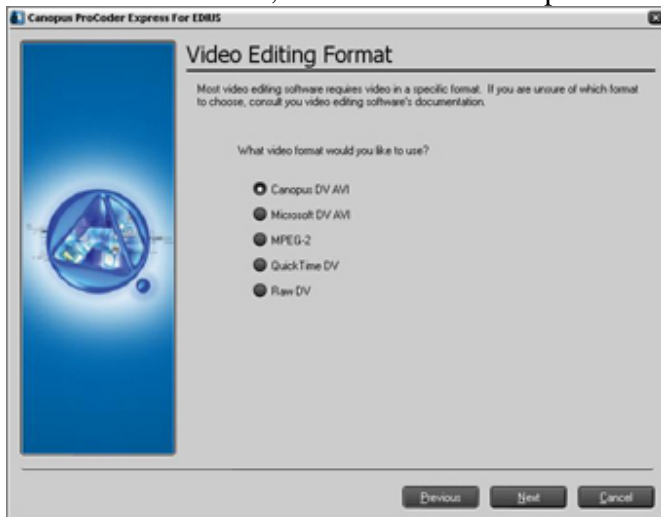

Let ProCoder choose the target

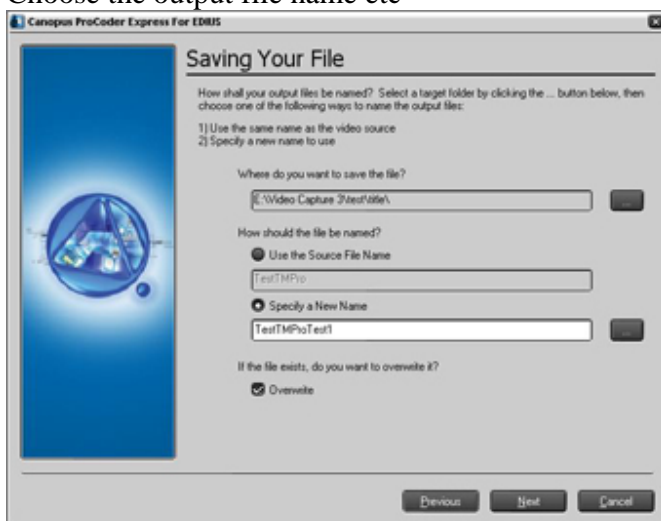

Select Video Editing

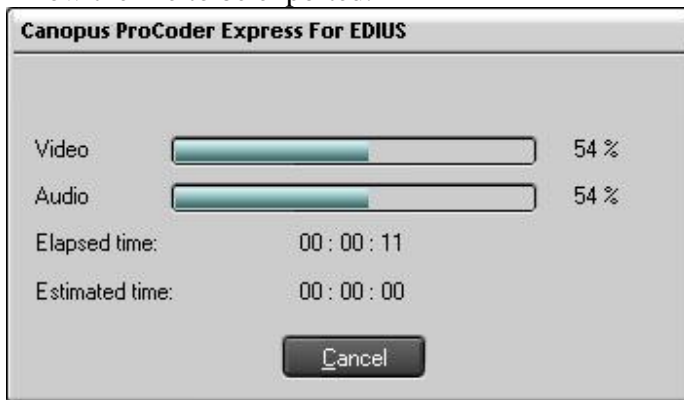

Select PAL or NTSC, and then select Canopus DV AVI

Choose the output file name etc

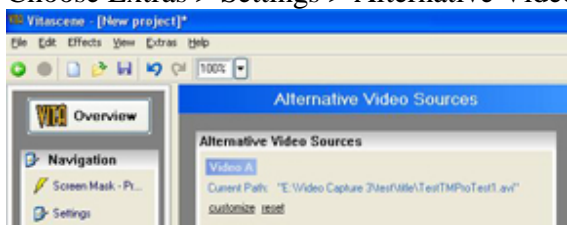

Allow the file to be exported.

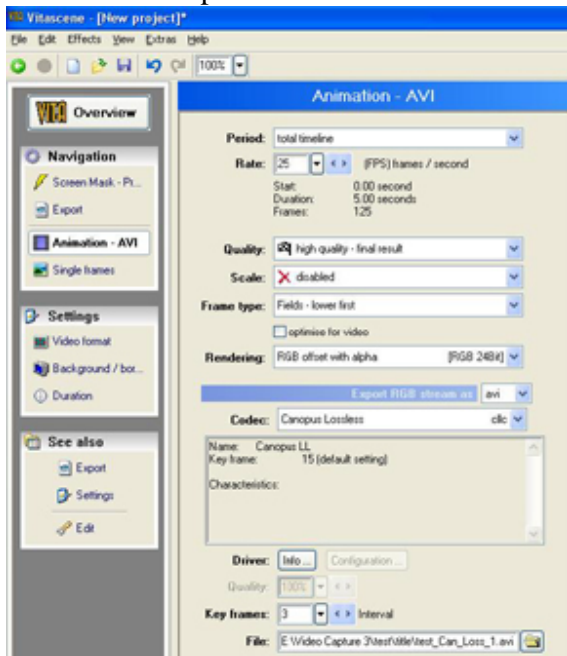

Start Vitascene.

Choose Extras > Settings > Alternative Video Sources, and Open the file.

Apply the Effects and Export the file from Vitascene as an AVI:
I used the Canopus Lossless codec.

Then open it as a new clip in EDIUS, complete with Alpha Channel Effects
